SUMMARY

B.Sc. IT graduate with hands-on full-stack development experience across React.js, Node.js/Express, REST APIs, and MongoDB, demonstrated through two MERN-stack projects. Skilled in building responsive, component-based frontend UIs, designing and integrating REST APIs, implementing JWT-based authentication, and debugging frontend-backend data flow using Postman and browser DevTools. Strong foundation in JavaScript, SQL/MySQL, and PostgreSQL, with backend development experience and currently expanding knowledge in Golang and Next.js. Quick to adapt to new technologies, with a focus on writing clean, maintainable, and well-structured code.

TECHNICAL SKILLS

Frontend: React.js, Redux, JavaScript (ES6+), TypeScript, HTML, CSS, Tailwind CSS, component-based UI development

Backend: Node.js, Express.js, REST API design & integration, JWT authentication, basic OOP & Data Structures

Databases: MongoDB (schema design), PostgreSQL, MySQL/SQL, Redis

Tools: Git, GitHub, Postman, Browser DevTools, Docker, JSON, API testing & debugging

Web Concepts: Responsive Web Development, Basic SEO, API Integration

Learning Now: Next.js, Golang

PROJECTS

Voya – Travel Booking Platform | MERN Stack 2026

- Built a full-stack travel booking application with React.js, Node.js, Express.js, and MongoDB, covering user authentication, package browsing, booking workflow, and a review system.
- Implemented JWT-based authentication with role-based access control to separate protected routes for regular users and admins.
- Designed REST API endpoints and MongoDB schemas for bookings, packages, and reviews, and connected them to the frontend using Axios.
- Built the frontend with React forms and state-driven UI to handle user input, authentication state, and API responses; used Postman and browser DevTools to trace request/response cycles and fix bugs in the request flow.

StudyLoop – Peer-to-Peer Learning Platform | MERN Stack 2026

- Building a peer-to-peer learning platform with React.js, Node.js, Express.js, and MongoDB where users list skills they can teach and skills they want to learn.
- Building reusable React components (dashboards, profile cards, skill-listing forms) to keep the UI consistent and easy to extend.
- Implementing REST API endpoints for user profiles and skill listings, and debugging the frontend-backend data flow to keep the UI in sync with MongoDB data.

EDUCATION

Bachelor of Science (B.Sc.) in Information Technology | University of Mumbai 2023 – 2026
CGPA: 8.70

Higher Secondary Certificate (HSC) | Maharashtra State Board 2021 – 2023

ACTIVITIES

- **Junior Developer, Coding Club** – contributed to backend development, supported junior members, and took part in coding and problem-solving activities.
